High Fidelity User Testing

Moore's Product Vision: For students who seek a more reliable educational planning tool, Degree Work PLUS is web-based application that easily lets the student select and choose which classes to take year-to-year, as well as connect to networks that best suits their needs. Unlike DegreeWorks, our product focuses on ease of access and aesthetics.

Product Category: Web-based application

How Our Product Is Better: Our application allows student users to review course recommendations based on their career interests. This lets each user maximize their time in school and focus on the skills they will need after graduation. Degree Works PLUS also facilitates networking with professionals currently operating in the user's field of interest, through direct connection and networking events.

[Ray Finkle]
